

Flamingos Curriculum Map

Writing

This term, our writing will focus on the exciting story *Journey to the River Sea* by Eva Ibbotson. We will be creating detailed and imaginative diary entries inspired by the book's characters, events, and themes. Throughout this task, we will practice using advanced grammar techniques, such as relative clauses, which give extra information about a noun, and parentheses, which allow us to add extra details or explanations. These skills will help us produce engaging, vivid, and descriptive entries that capture the excitement and spirit of the story while demonstrating our writing abilities.

Reading

This term, our reading will focus on a range of interesting non-fiction texts. We will explore texts such as *Awesome Men: David Attenborough, Rivers and Coasts*, and *Ordnance Survey Maps*. Through these texts, we will develop our skills in finding information, understanding key vocabulary, and using headings, diagrams and maps to support our reading. Throughout the term, we will continue to build important reading skills, including retrieval, inference, summarising and making predictions, as well as taking part in thoughtful discussions about what we read.

Term 3

Maths

This term in Maths, we will be learning about multiplication, division, fractions, decimals and percentages. We will practise multiplying and dividing numbers and using these skills to solve problems. We will also learn about fractions and how they link to decimals and percentages. Throughout the term, we will practise explaining our thinking and improving our problem-solving skills.

Science

This term in Science, we will be learning about **Animals, including Humans**. We will explore different types of animals and learn about their needs for survival, including food, water and shelter. We will also learn about the human body, including how it grows and changes, and the importance of keeping healthy. Throughout the term, children will take part in discussions and simple investigations, developing their skills in observing, asking questions and recording what they find.

Learning Journey

Computing

This term in Computing, we will focus on Data Information and Excel. We will learn how to organize, analyze, and interpret data using Excel, explore techniques for creating effective spreadsheets, and understand how to present, store, and manage data safely and responsibly.

Music

In Term 3 Music, we will focus on Layering and Sequencing with the ukulele. Students will learn to create layered sounds using loops, explore how different rhythms and melodies can work together, and use the ukulele to compose and record their own musical mixes.

Art

In Art this term, we will be studying the work of Paul Cezanne and exploring landscapes and abstract art. We will learn about different techniques and styles, experiment with colour, shape and perspective, and create our own artwork inspired by what we study.

Throughout the term, we will develop our skills in observing, experimenting, and expressing our ideas creatively.

Geography

This term in Geography, we will be studying maps, including how to use six figure grid references. We will learn how to read and interpret different types of maps, understand symbols and scales, and use coordinates to locate places accurately. Throughout the term, we will develop our skills in map reading, navigation, and recording information.

RE

This term in RE, our focus question is: If God is everywhere, why go to a place of worship? We will explore the reasons people attend places of worship, consider how these spaces support faith and community, and reflect on how rituals, prayers, and traditions help believers connect with God and express their beliefs.
